Particularly Applicant's arguments that Ganslein (EP 0891007), the closest prior art, solves the problem of achieving improved contact of the bushings 1, 2 with the rail web 9 by not radially expanding and not axially extruding any of the material of the outer bushing 2, but instead provides a turned-out hollow in the outer bushing 2 that accepts axially extruded material from the inner bushing 1 when a mandrel 12 is drawn through the inner bushing 1, see the whole section titled Remarks/Arguments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
